July 22, 2005 – A British Columbia Company Has Added Another First To Its Long List Of Heater Development Achievements.

RICHMOND, BC– International Thermal Research Ltd., of Richmond, British Columbia, has just received Canadian Standards Association (CSA) certification to Canadian CSA and U.S. ANSI/UL standards for its new diesel fired Oasis™ modular hydronic heating system and thereby approving it for installation into recreational vehicles in both Canada and the United States. It is the first, and only, certification issued for such a system at this time.

“Our company is proud of the design and performance characteristics of the Oasis Modular Hydronic Heating System and we continue in our belief that it is unmatched by any other product in the market. The earning of the CSA mark only serves to reinforce the company’s commitment to produce products that are not only known for their high quality and superior performance but also for uncompromised safety,” said Ed Robinson, President and Chief Executive Officer of International Thermal Research Ltd.

About ITR.

ITR, founded in 1984, is a Canadian leader in the design and manufacture of diesel-fired powered and non-powered products for space and hot water heating. These products have been supplied to a diverse customer base including recreational vehicle OEM’s, specialized truck vehicle manufacturers, marine yachts, and the mining and camping field. The basic burner system used in its powered products has been become incorporated into field kitchen food preparation equipment and has become the standard for the US military. ITR is headquartered in Richmond, British Columbia and has a United States operation, International Thermal Research Inc. (ITRI) that conducts sales and service and is located in Vancouver, Washington. For more information about the company and our products, visit www.itrheat.com.
