Certified Rebuild Program

Cost effective rebuild option to bring your heater back to new at a fraction of the cost

Why Rebuild? -

Minimize and offset annual maintenance costs / Restore heater performance to original or better / Increase coach resale value / Restore warranty / Tailor the rebuild to your budget

What is done? -

Complete overall inspection and evaluation of the heater / Recommendation of the necessary level of rebuild required / Replacement of major mechanical, burner, and electrical components subject to the most wear / Reassembly and performance testing of the heater / Quick turnaround with limited downtime

Pricing Options? -

Level 1 – Burner and Mechanical Box components,

Level 2 – Level 1 + Water Jacket + insulating gasket

Level 3– Level 1 + Electronic control board

Level 4 – Complete Rebuild – All of the above

What is the warranty? –

Level 1, 2, 3 – 6 months

Level 4 complete rebuild – 12 months

Who pays and handles shipping? –

You or your dealer arrange the shipping to our US or Canadian facility. Upon completion the heater will be returned to the specified address (freight charges not included).

How much does it cost? –

The cost depends on the level of rebuild. If a complete rebuild is not necessary, we'll quote only for the level(s) recommended or for that selected.

How long does it take? –

The timeframe depends on the level of rebuild selected. In most cases the heater should be in the factory for no more than three days.

What if I want or require a new heater? –

See the *Replacement heater program* on the Oasis webpage. We can replace your heater with a model that offers the latest in diesel hydronic heating technology and design.

Who do I contact for further info ? –

See the *contact page* for the US or Canadian toll free phone #'s or use the contact form to have an ITR representative contact you with further information.
